

Press Release

14th International Conference on Intelligent Tutoring Systems "A 30 Year Legacy of ITS Conferences"

Montréal, Canada, June 13-15, 2018

The Intelligent Tutoring Systems (ITS) 2018 Conference celebrates 30 years of ongoing contribution in the field of advanced computer technologies, artificial intelligence techniques and interdisciplinary research for enabling, supporting and enhancing human learning.

The Conference aspires to regroup and promote high-quality research and businesses in the artificial intelligence domain. Topics of interest include Artificial Intelligence in Education, Educational Data Mining, Machine Learning, Deep Learning, Serious Games, Virtual Reality for training.

This year, ITS comes back to its birth place, Montreal in Canada and proudly announces three distinguished keynote speakers:

- Yoshua Bengio, Head of the Montreal Institute for Learning Algorithms (MILA), one of the foremost thinkers in an advanced subset of AI (CANADA)
- Vania Dimitrova, Associate Professor at the University of Leeds, leading research activity on AI for augmenting human intelligence (UK)
- Sidney D'Mello, Associate Professor in the Institute of Cognitive Science and Department of Computer Science at the University of Colorado Boulder, specialized in the dynamic interplay between cognition and emotion (USA).

During the main conference, held at **La Plaza Centre de Congres, on June 13-15**, state-of-the-art research in the fields of computer sciences, artificial intelligence, psychology, pedagogy and cognitive sciences will be presented. Interested participants may also choose from a great variety of selected **workshops and tutorials**, held at **UQAM Pavillon Sherbrooke on June 11-12, 2018**. More information about the Conference is to be found on the conference website:
