

## Conférence conjointe ISC et CRIA

### ***Critical thinking about AI and explanation — A perspective on accomplishments, methodology, and emerging applications***

#### **Conférencier invité : William J. Clancey**

William J. Clancey is a computer scientist whose research relates cognitive and social science in the study of work practices and the design of agent systems. At NASA Ames Research Center, he was Chief Scientist of Human-Centered Computing, Intelligent Systems Division (1998-2013); his team automated file management between Johnson Space Center Mission Control and the International Space Station. His studies relating people and technology include numerous field science expeditions from the Canadian High Arctic to Belize and Polynesia. He is Senior Research Scientist at the Florida Institute for Human and Machine Cognition in Pensacola.
